Our Mission

The LAM Foundation urgently seeks safe and effective treatments, and ultimately a cure, for lymphangioleiomyomatosis (LAM) through advocacy and the funding of promising research. We are dedicated to serving the scientific, medical and patient communities by offering information, resources and a worldwide network of hope and support.
To our Friends and Supporters,

With your support and leadership, The LAM Foundation continues to thrive as an exemplary patient advocacy organization, while serving as a source of hope for individuals affected by LAM. In 2019, The LAM Foundation distributed nearly half a million dollars to support LAM investigators and LAM patients who engaged or enrolled in bench, translational, clinical, and quality of life research. Additionally, we produced 23 regional educational events, sharing information, and raising LAM awareness. And fiscally, the Foundation exceeded performance goals due largely to support from a diverse and generous donor base. A few of our accomplishments this year include:

- **Patient Support:** 199 new patients registered with The LAM Foundation; LAM Liaisons hosted 23 regional educational meetings in partnership with 15 LAM Clinics, reaching 700 attendees; we expanded the Circle of Hope Transplant Support Program providing support to 19 participants, 3 of whom received transplants in 2019; and we successfully facilitated the procurement of 16 tissue samples that were shipped to LAM investigators.

- **Research:** Facilitated the award of $410,000 in new LAM research grants via The LAM Foundation Grant Program and helped raise $73,000 via the UPenn’s Orphan Disease Center and its annual Million Dollar Bike Ride. Investments by the Foundation in a single cell RNA sequencing project produced preliminary findings that may have implications related to the source of LAM.

- **LAM Clinic Network:** On-boarded four new LAM clinics in Frankfurt, Germany; Dublin, Ireland; New York City, NY; and Hyderabad, India; launched an extensive outreach program to support patient recruitment for MIDAS and MILED clinical trials; contributed $50,000 to sustain the MIDAS registry; hosted three Clinic Network webinars and a 70-person luncheon at the American Thoracic Society meeting in Dallas, providing a forum for discussing case studies, best practices, and clinical trial design.

- **Operational Excellence and Innovation:** Maintained top tier status with Charity Navigator and GuideStar and re-certified with the National Health Council for the 16th consecutive year; produced the first-ever Day of Giving, a digital fundraising event, raised $260,000 for LAM research; recruited five new board members and hosted two multi-day, in-person board meetings in Philadelphia and Cincinnati.

Thank you for another impressive year that exemplified the strength of the LAM community, whose passion, support, and resilience are the most important factor in our success.

Sincerely,

Susan E. Sherman, MHA
Chief Executive Officer

Francis X. McCormack, MD
Scientific Director
Circle of Hope Transplant Support Group

The Circle of Hope (COH) was launched in 2018 and is led by Sharlene Dunn, a LAM patient who received a lung transplant in 2010, and Dan Dilling, MD, LAM Clinic Director at Loyola Medicine. The program offers one-on-one mentorship, group support, and education to women with LAM who are considering and/or undergoing the lung transplantation process. The Program offers online educational webinars, mentoring, and support groups.

Additionally, the program makes every effort to educate and coach patients regarding tissue donation (lung and other organs), including outreach to patients, clinic directors, transplant centers, and LAM scientists, with the goal of achieving a 100% percent rate of tissue recovery and distribution to LAM research labs.

Approval of Sirolimus Grows

As of 2019, 40 countries have approved sirolimus as a treatment for LAM. Sirolimus (also known as rapamycin or Rapamune) was approved by the FDA in May of 2015 for the treatment of LAM. Continuing efforts by international patient advocacy organizations, industry, and government partners to expand sirolimus approvals globally ensure that more women with LAM have access to this treatment. The LAM Foundation is thankful to all of those who have played a part in the approval of sirolimus and for those who are working for approval in even more countries.
The LAM Foundation Awards $410,000 in 2019 to Six New Research Projects

With the support of our generous donors, The LAM Foundation funded six grants to support researchers studying LAM. This year we funded a new grant category called the Seed Grant. This is a smaller award given to investigators with promising new ideas. Seed Grant recipients are encouraged to collect additional data and refine their proposals for re-submission. We want to thank the members of the LAM Scientific Advisory Board (SAB) for recommending finalists to The LAM Foundation Board of Directors.

**CAREER DEVELOPMENT AWARD:**  
$180,000

**ESTABLISHED INVESTIGATOR AWARD:**

University of Pennsylvania Orphan Disease Center Million Dollar Bike Ride Grant

For the 6th year in a row, The LAM Foundation and the LAM Easy Breathers cycling team participated in the Million Dollar Bike Ride, raising more than $43,000. A maximum of $30,000 of funds raised was eligible for a dollar for dollar match by the UPenn Orphan Disease Center, for a total of $73,000 for LAM research.

In 2019, the Multicenter Interventional Lymphangioleiomyomatosis Early Disease (MILED) Trial continued to pursue answers to an important clinical question: if we START low dose sirolimus EARLY, can we maintain normal lung function? This study is led by Frank McCormack, MD, at the University of Cincinnati and is being conducted at select LAM Clinics located across the country. The LAM Foundation has played a pivotal role by connecting with patients and funding patient travel.

“We are very thankful for the many women who have inquired about the study, even if they were not eligible, and for those who shared study materials or personal experiences with other women with LAM or on social media,” says Susan McMahan, project manager for the MILED Trial.

To learn more about the MILED Trial, visit our website at www.thelamfoundation.org/miled.

LAM Liaison Network

To help women with LAM connect with one another, The LAM Foundation developed the LAM Liaison Patient Network. This network ensures that all women with LAM receive personal attention and connection with other LAM patients and family members.

A LAM Liaison is a regional leader who reaches out to patients in her region and organizes one or more regional meetings each year. These events give patients the opportunity to meet others who live in their area and discuss important issues.

**IN 2019**

- **31** LAM Liaisons hosted
- **18** Regional Education Meetings
- **12** in partnership with LAM Clinics
- **reaching 400** ATTENDEES

In partnership with the Tuberous Sclerosis (TS) Alliance, The LAM Foundation produced the TSC & LAM Conference Series 2019 with meetings held in Atlanta, Boston, Chicago, Los Angeles, and St. Louis, reaching 335 attendees.

The LAM Foundation Scientific Advisory Board

An outstanding and dedicated group of individual’s makes up The LAM Foundation Scientific Advisory Board. This group is the cornerstone of The LAM Foundation’s research program. The LAM Scientific Board advises the Foundation on all scientific matters and formulates the direction of LAM research to be supported by The LAM Foundation Board of Directors.
