

International LAM and Rare Lung Diseases Clinics and Research Networks

The LAM Foundation seeks to help improve the care and treatment of all LAM patients. Toward this end, we have a program to develop regional LAM Clinics throughout the world. The objective of The LAM Foundation Clinic and Research Network is to focus LAM care to medical institutions or hospitals that have the interest and expertise to deliver state of the art, coordinated, multidisciplinary LAM care, and to perform cooperative research with other LAM clinics.

Location	Institution	Clinic Director	Phone Number
